LOUISIANA WEEKLY CLIMATE SUMMARY

Volume 2, Issue 42

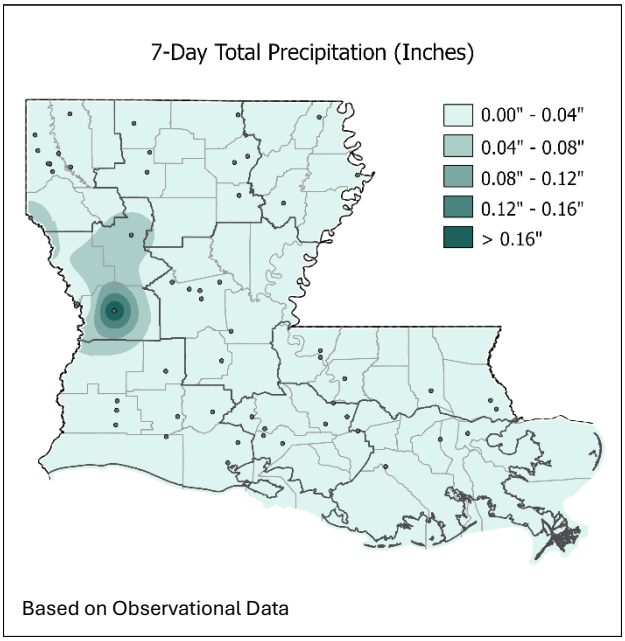

October 14 – October 20, 2026

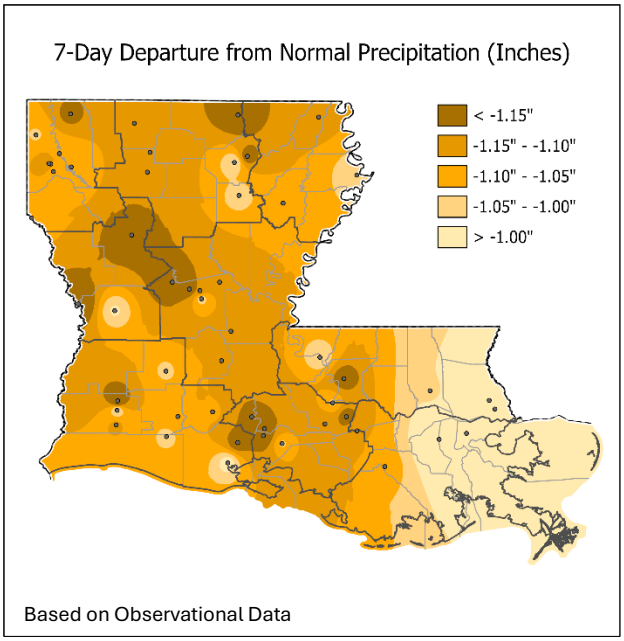

** PROVISIONAL DATA*

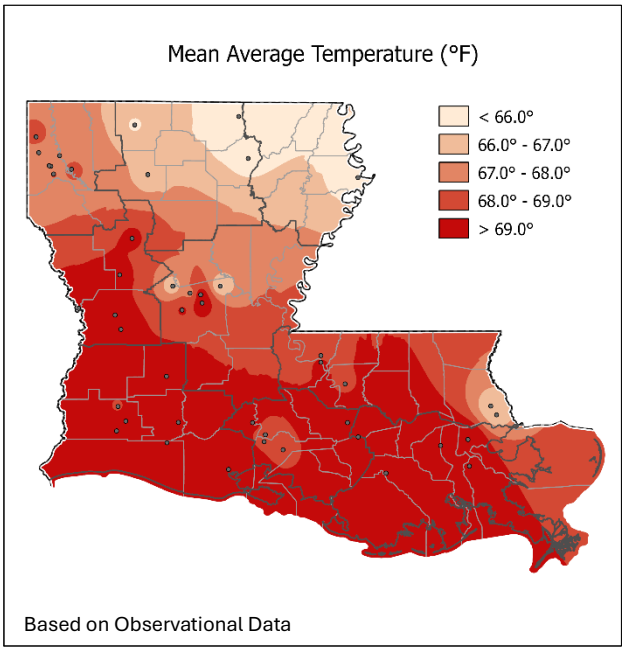

Louisiana Office of State Climatology
Louisiana State University
lastateclimate@lsu.edu
225-578-6870

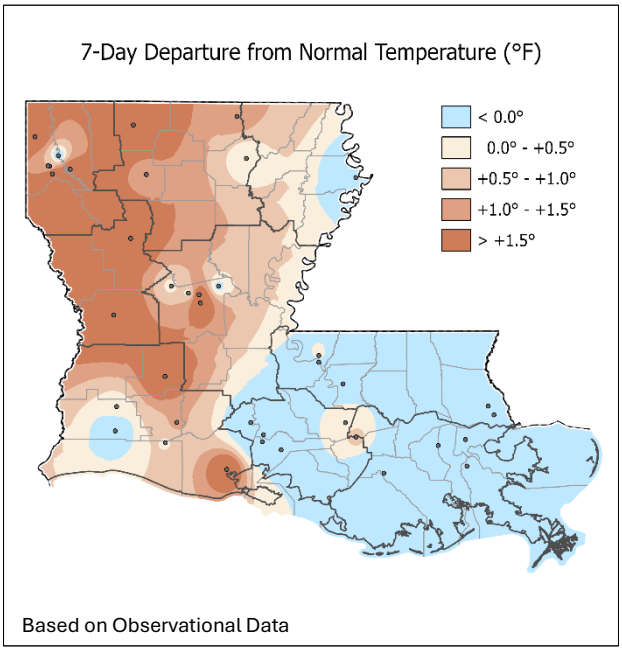

7-Day Accumulated Rainfall & Average Temperatures: 14 - 20 Oct 2026

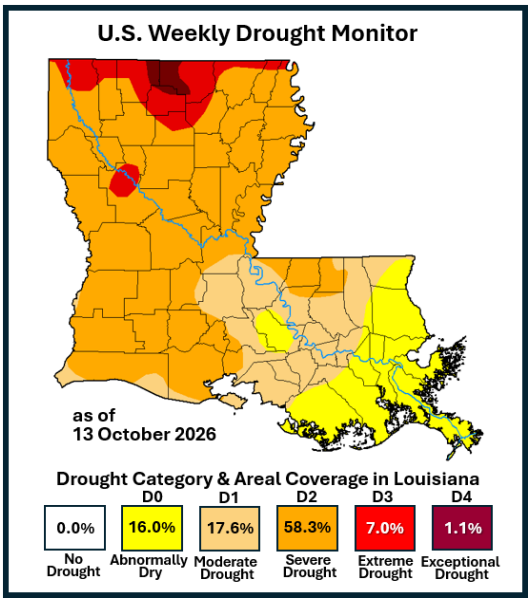

- for the second week in a row, most reporting stations recorded no precipitation as a frontal passage on Oct 16 was mostly dry and high pressure took over afterwards
- the second consecutive week of virtually no precipitation combined with a drier air mass and other factors led to a significant increase in drought coverage across the state per the ***U.S. Drought Monitor*** (p. 3)

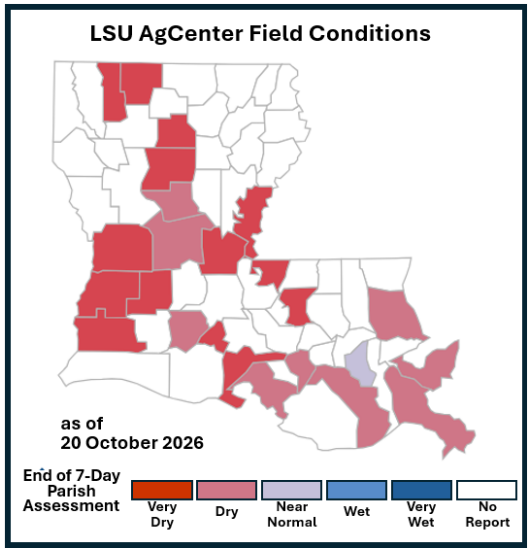

- the 7-day run began with significantly warmer than normal temperatures with highs soaring into the 90°s
- after a frontal passage on Oct 16, the coolest air mass of the season moved over the state, causing a wide range of temperatures to occur during the period
- for the first time this fall, low temperatures fell into the 40°s across the state and even down into the 30°s at some locations, including the statewide low of 36°F at Monroe 26 N recorded on Oct 18

U.S. Drought Monitor (USDM): Issued October 22, 2026

- includes data thru October 20

- for the second consecutive week, much if not most of the state did not receive any precipitation as a frontal passage on Oct 16 was mostly dry and the dry and stable air mass that moved over the state afterwards prevented any precipitation from occurring
- the 7-day monitoring period began with significantly warmer than normal temperatures which kept moisture demand high, following the frontal passage, conditions cooled but humidities were very low and winds increased, which continued to dry already parched soils
- due to the aforementioned conditions, the updated weekly ***U.S. Drought Monitor*** depiction showed an increase in coverage of all drought categories, but the most significant increase was in the D3 'Severe' drought category which now covers much of northern and central Louisiana
- all but one LSU AgCenter parish agent across the state noted 'Dry' or 'Very Dry' conditions in their respective parishes; all reporting agents noted that conditions had 'Slightly' or 'Significantly' degraded during the 7-day monitoring period
- as of Oct 18, the USDA noted 'Short' or 'Very Short' topsoil and subsoil conditions for 86% and 82% of the state, respectively; pasture and range conditions were noted as 'Fair', 'Poor', or 'Very Poor' for 73% of the state
- as of Oct 20, most parishes in Louisiana were under 'Burn Bans'; Parish Fire Danger levels were listed as 'High', 'Very High', or 'Extreme' for the majority of monitored parishes

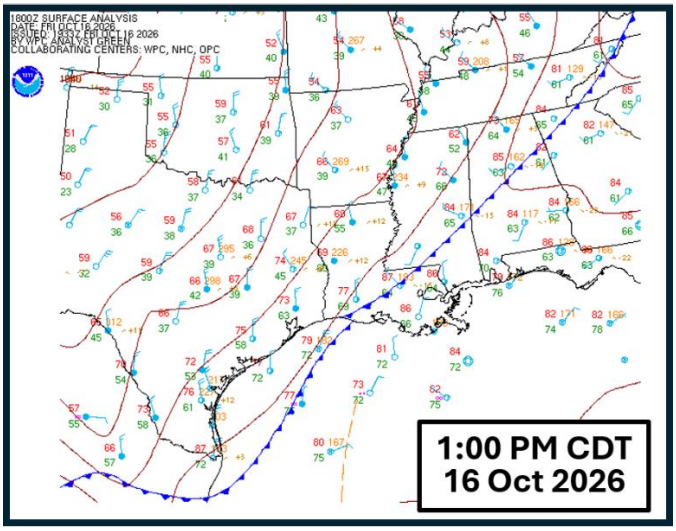

Parish ***Burn Bans*** are issued and lifted by local designated agencies and/or officials. ***Daily Fire Danger*** maps are produced by the USDA Forest Service, the Nat'l Interagency Fire Center (NIFC) & the LDAF.

Louisiana Office of State Climatology

225-578-6870

- ***Severe/Stormy Weather:***
  There were no severe weather *Watches* or *Warnings* issued during the 7-day period.

An increase in humidity prior to a 'cold' front passage on Oct 16 prompted the Lake Charles and Slidell NWS offices to issue *Dense Fog Advisories* for southeastern and portions of southcentral Louisiana on Oct 14. All four NWS offices serving Louisiana issued *Dense Fog Advisories* that included a majority of the state on Oct 15.

On the backside of the Oct 16 frontal passage, dry and windy conditions prompted NWS offices to issue *Red Flag Warnings* on Oct 16 and Oct 17. Numerous fires were reported across the state during the period.

- Temperature (^{0}F) DFN - Departure from Normal P - Precipitation (in.) "-" indicates data not available "M" - missing observation(s)

Precipitation and temperature data are primarily retrieved through the ACIS QueryBuilder (rcc-acis.org) and the cli-MATE platform (MRCC Application Tools Environment), both of which are maintained by the NOAA Regional Climate Centers (RCCs).

Drought data are sourced from the U.S. Drought Monitor (unl.edu), the LSU AgCenter, and the Louisiana Dept. of Agriculture & Forestry.
